

ANNOUNCEMENT OF THE

**2010**  
**Economics Undergraduate Theses Prize**  
**«Angelo Costa»\***  
*XIV<sup>th</sup> Edition*

1) *Rivista di Politica Economica (RPE)* announces the XIV<sup>th</sup> competition for the publication of the five most deserving papers taken from undergraduate theses in Economics (two-year MSc.) by students graduated in an Italian university. The Prize consists in the publication of the winning papers in the November-December 2010 issue of *RPE*, which will be published in Italian and separately in English.

The initiative has two targets:

– to renew the commitment to make promising Italian graduates in Economics known, awarding them with the publication of their paper so as to encourage the continuation of their studies and their chances of admission to Master and/or Ph.D. programs;

---

\* Angelo Costa was born in Genoa on April 18<sup>th</sup>, 1901, into an established family of Genoese merchants. In 1925, having completed his studies at the “Scuola Superiore di Commercio” at the University of Genoa, he joined his family business, strengthening its market share while focusing his attention on the shipping and engineering industries. In 1945 he was elected as the first president of Confindustria, which he led for the entire post-war reconstruction period until 1955. From 1966 to 1970 he was once again elected to chair the board of Confindustria.

A free-market advocate, Angelo Costa always opposed the constraints imposed by statism and stressed the key role played by small-and medium-sized enterprises in Italy’s economic and industrial growth.

– to promote the publication of excellent studies which too often remain as mimeos and cannot be appreciated by a larger audience.
